

A ternary plot showing the distribution of data points. The plot is an equilateral triangle with vertices labeled 0, 5, and 0. The left edge is labeled 'Left label', the right edge is labeled 'Right label', and the bottom edge is labeled 'Bottom label'. The data points are categorized into 'Red Squares' (red dots) and 'test' (blue dots). The 'Red Squares' are clustered in the bottom-left region, while the 'test' point is located near the bottom center.

~~Bottom label~~
